SENIOR SOFTWARE ENGINEER

Brandin Canfield

PROFILE

Senior Software Engineer specialized in building modern full-stack web apps

EXPERIENCE

SENIOR SOFTWARE ENGINEER, MILE TWO – 2022-PRESENT

Working in a diverse role that spans multiple projects and roles at a time. My responsibilities often include team leadership, rapid-prototyping, or architectural design.

SOFTWARE ENGINEER, MILE TWO – 2020-2022

Worked on a variety of projects as a contributor and active team member. My main responsibilities were to deliver high-quality code while collaborating with other developers and researchers.

SOFTWARE ENGINEER, BALL AEROSPACE – 2020

As a mid-level engineer, I became an essential member of a development team and took on additional responsibilities such as production deployments and code reviews. I transitioned to mainly working on the cloud architecture for the project.

ASSOCIATE SOFTWARE ENGINEER, BALL AEROSPACE – 2018-2020

As a junior engineer, I worked on a variety of projects on large agile teams and gained initial exposure to an organized software development process.

EDUCATION

Wright State University, Dayton OH – BS in Computer Science, 2014-2018

SKILLS

- Specializing in full-stack development using Next.js, React.js, and Postgresql. I frequently use other utility languages such as Go and Python.

- Experienced in leading development teams and making architectural decisions

CERTIFICATIONS

CompTIA Security+ – 2019 - Present
